

Testimonials

Mrs. Wendy Yung

My three young adult children and I have been patients of Dr. Cheng's practice since 2003. We have all been very pleased with the care we have received.

Dr. Cheng and her associate are extremely thorough. They explain all procedures and are more than happy to answer any of our questions. The children are very comfortable coming here and have no problem coming on their own. They can easily explain the results of their eye tests to me and if any further treatment is needed. I also receive an email from the doctor summarizing the examination.

The office is readily reached either by phone or email. At regular intervals reminders of visits are sent to us. I find this very helpful as I often forget when one of us is due for a check-up. I also find the office staff very helpful.

I would recommend Dr. Ada Cheng Optometrists to anyone looking for comprehensive eye care for themselves and their families.
